This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TO THE GENTLE PRINTER

This book, prepared with earnest thought and loving care is respectfully and admiringly dedicated. Although we have, in past times, uttered booklets similar to this, and forecasting it, no previous issue from our specimen room has suggested with such fullness, variety and beauty as this book, the uses to which our type faces, borders and other productions may be put. These pages are only suggestions, but it is our hope and expectation that they will serve to inspire our thousands of customers and other thousands of their employees and associates to model after and improve upon our efforts. And so this book is inscribed to the one who loves harmony in color and the symphonious click of metal type--Superior Copper-Mixed Type.

BARNHART BROS. & SPINDLER.

Superior Copper-Mixed Type and Printers Material of our manufacture, kept in stock and for sale by our Branch Houses:

Minnesota Type Foundry Co., ... St. Paul, Minn.
Great Western Type Foundry, ... Kansas City, Mo.
St. Louis Printers Supply Co., ... St. Louis, Mo.
Great Western Type Foundry, ... Omaha, Neb.

And by the following Dealers:

R. W. Hartnett & Bros., ... Philadelphia, Pa.
F. Wesel Mfg. Co., ... New York.
Nicklin's Southwest Printers Supply, . Los Angeles. Cal.
Pacific Printers Supply House, ... Seattle, Wash.
Kennedy & Mason, ... Cincinnati, O.
Heybach-Bush Co., ... Louisville, Ky.
Miller & Richard, ... Toronto, Can.

Also for sale by Dealers in Printers Supplies.

The Advance

Popularly known as

"The Easy Cutter."

Special Machinery and improved methods of construction enable the manufacturers to produce a high-class Cutter at a moderate price.

A Few Good Points:

The celebrated "Easy Lever" gives great power and makes an easy shear cut. Gibs and set-screws to take up wear of knife bar. Guages accurately squared to the knife. Interlocking guage and clamp for cutting narrow strips. All screws and shafts are steel and bearings scraped to fit. Let us show you the ADVANCE. It is sure to please you in style, quality and price.

SIX SIZES:
16 and 19 inch Pony.
22½, 25, 30, 33 inch.

Kept in stock for immediate shipment by

SAMUEL BINGHAM'S SON MFG. CO.

CHICAGO, ILL.

30 A 60 a 6 Point Mazarin $2 50

Webster defines Superior as follows: "Higher or greater in excellence: surpassing others in the greatness, goodness or value of any quality." The World's Fair award to Barnhart Bros. & Spindler, was for "Type possessing the essential features of superior toughness, hardness, fine finish and consequent durability through the use of best material in composition of metal and the employment of highly perfected steam type-casting machines of precision and efficiency of performance."

24 A 50 a 8 Point Mazarin $2 75

The use of cardboard to justify lines of job type belongs to the days of the old hand press. Our improved Copper Thin Spaces do away with all this annoyance. We now furnish them in improved wooden cases, fifteen sizes, for one dollar and seventy-five cents.

20 A 40 a 10 Point Mazarin $2 95

Type of the fifteenth century was made without system. The dimensions of each face were determined chiefly by the manuscript copy which had been selected as the model.

18 A 36 a 12 Point Mazarin $3 10

The first processes in the practise of typography, the cutting of punches and making of moulds, demanded a degree of

GORDON

PRESS

Kept in stock and For sale by

Barnhart Bros. & Spindler

183 to 187 Monroe St.,
CHICAGO.

Minnesota Type Foundry Co., St. Paul, Minn.
Great Western Type Foundry, Kansas City, Mo.
St. Louis Printers Supply Co., St. Louis, Mo.
Great Western Type Foundry, Omaha, Neb.

Old Style Gordon.

THE Chandler & Price Old Style Gordon Press is built heavy and strong Runs easily, quietly and quickly on all grades of printing. Side arm and shaft are made of forged steel without seam or weld. Cam rollers are hardened tool steel. Impression throw-off is positive and easy to operate. No springs, clamps or catches. Depressible grippers, cannot get beneath the rollers. Chase clamps are strong, simple and instantaneous. New improvements for distribution of ink unequaled. These presses geared to run as rapidly as it is possible to feed them, without racking or extra wear. The horizontal platen, with long rest, makes them desirable for quick and easy feeding. Sizes and prices sent on application. Correspondence solicited.

U. S. A.

A Printer's Proof Press.

RELIANCE.... LEVER CUTTER

Clearly outranks all Cutters of its class. In strength, accuracy and general construction, it has no equal. All parts are strictly interchangeable. No claims are made for the Reliance which are not substantiated by the Cutter itself. Over 850 sold since its introduction four years ago, and not one returned. It will outlast any other Cutter. Four sizes made: 16½, 23¼, 25½ and 28½ inches.

THE IMPROVED HAND PRESS

The Improved Hand Press is especially designed as a Proof Press for printing office use, and every good printer ought to own one, since perfect proofs, equal to a press proof can be made on it (flat impression) of a type form, the full size of the platen, and if any half-tone cuts in such form, they will look as well as an engraver's proof.

Description, illustration, prices and testimonials on application.

Four sizes made: Platen, 14⅛x 18½, 17x22, 20x25 and 22x30 inches.

Paper Cutter

This Cutter has more bed for handling paper than any other make of Cutters. It is equipped with a compound lever, making the cutting easy. It is built from new designs by scientific methods. Being perfectly counterbalanced, it will work quickly with the minimum of effort. All the gauges are accurately squared with the knife. All its parts are strictly interchangeable, and accurately fitting replacements may be ordered by number. The back gauge and clamp interlock, clamping as narrow as one-half inch. The fingers of the clamp have a broad surface to avoid creasing the stock.

Strong Neat Clean

The impression is made by a solid steel cylinder, which is held firmly in place by truck wheels running in a square groove on the under side of the bearers or tracks. The cylinder runs in steel anti-friction roller bearings, which insure its durability as well as ease of operation. The cylinder is covered with felt, giving clear, distinct print with but little make-ready, and does not injure the type in the least. An impression is taken by each forward or backward motion of the cylinder, and it runs so easily that a boy or girl of fifteen can operate it without undue exertion. If you are tired of pulling the old Hand Press, and want a light, fast, substantial and convenient press, just investigate the

Indestructible

Copper Spaces

No well regulated printing office ought to be without a case of Copper Thin Spaces, as they are labor-saving, time-saving and temper-saving appliances. They take the place of the slipshod card and paper spaces that have a tendency to swell when wet, and by the use of which many hours of valuable time is lost. Not only that, but printers cannot afford to waste the time of high-priced compositors, who, realizing the value of good justification cut card and paper spaces slowly and inaccurately, when a font of our indestructible Copper Thin Spaces, either one or one-half point in thickness, cut to sixteen different sizes from six to seventy-two point, with case for same, can be had for $1.75. . . . . .

. . Send for samples . .

These Spaces can be purchased of the Minnesota Type Foundry Co., St. Paul, Minn.; Great Western Type Foundry, Kansas City, Mo.; St. Louis Printers Supply Co., St. Louis, Mo.; Great Western Type Foundry, Omaha, Neb., and all dealers in printing material. . . . . .

UPON comparing Luxor with almost any other style of type, the discerning printer will readily appreciate its multiplicity of advantages as a type for ads and all commercial printing where bold effects are sought. Grandpa and Grandma can read it without "specs." It's so strong--so clean--that an ad set in it seems to mean just what it says. It impresses one the same as a man who looks you straight in the eyes when he talks. And another point for the printer--where are the hair lines that wear out before the heavy ones? There are none.

Nothing weak--but it's a Luxor

The only Gordon that received a Medal and Diploma at the World's Columbian Exposition of 1893.

The only press which embodies all of the following recent patents and improvements: New Impression Throw-off holds the eccentric shaft absolutely stationary, either on or off the impression. New Depressible Grippers and Gripper Bar may be depressed to tympan at any position of platen. New Noiseless Disc Motion insures the most perfect distribution. Single disc easily cleaned, no joints to retain dirt and destroy colored inks. Foot-Brake and Guage-Pin Box, time and money savers, makes the press complete. Perfectly balanced at all points: the Challenge may be run at high speed on fine work.

The name of

Barnhart

A guarantee of excellence

When you are tired of soft type and think you want something to

Stand the Wear

you can rest assured that copper-mixed is not an experiment--- it is the most durable metal known to printers

ONLY a day or so ago, one of our printer friends happened in--- he asked us what we did with our type after finishing the press-work on a run of specimen books. He seemed inclined to doubt our word when we told him we used the type for printing future editions. He thought it customary for type-founders to throw the type in the hell box after printing the specimen. So it is---with most of them--- but Copper-Mixed stands the wear so well that a run of thirty or forty thousand impressions does not affect it---except from a microscopical stand-point. The type used for printing this job specimen book---a large edition---is in such excellent condition that the pages will be laid away for future specimen printing, which is the most particular work there is in the printing line. The great newspapers of the United States appreciate this important item of durability. We know it from our heavy sales of body type---and, they tell us so. The metal in all our type (body and display) is made from uniform formulas--- formulas that have made famous the name of

Barnhart.

Jones Gordon

A Popular Press

Before purchasing examine this

Excellent Gordon

and you will be delighted

For sale by

Barnhart Bros. & Spindler,

Chicago, Illinois.

And all their Branches.

To the craft:

The rapidly increasing demand for Jones Gordon Presses gives the manufacturers confidence to assert that it is the coming popular press. The many points of advantage it possesses over any other Gordon made, commends it at once to the well-informed printer, while its price commends it to the careful conservative buyer.

This press has a very simple Impression Throw-off. It is the only Gordon made having a distributing roller, which passes from the fountain to the disc twice at each impression. The form rollers never touch the fountain roller.

A Roller Throw-off which lifts the rollers from the form when ever the impression is off, will be put on any size press for the additional cost of $25.00. All pressmen acknowledge there is a big saving in using a Jones Gordon. If you are in the market for a job press, don't fail to look into these excellent features before purchasing.

Baskerville

School
Master
Type
Founder
and
Printer

John Baskerville, a celebrated printer, and the introducer of many improvements in type-founding, was born at Wolverly in Worcestershire in 1706, and died in 1775. About the age of twenty he became a writing-master at Birmingham, and he seems to have had a great talent for caligraphy and carving in stone. About the year 1750 he began to make experiments in type-founding, and soon succeeded in producing types much superior in distinctness and elegance to any that had been hitherto employed. He then set up a printing house and published his first work, a Virgil in royal quarto. Horace, Terrence, Catullus, and others were also printed by him. These books are admirable specimens of typography; and Baskerville is deservedly ranked among the foremost of those who have advanced the art of printing. He did not print many works, as the sale did not meet his expectations. Specimens from the Baskerville press are not easily had, and are of great value.
